

CROWN ELECTRIC SCREEN

Smart designed electrical screen where the screen fabric comes out in the front of the cassette. Because of this construction a 7 cm gap between the wall and the screen is created. This function makes it easy to place the Crown in front of paintings and whiteboards. The quick installation system to the Crown saves both time and space.

CASSETTE / COLOUR

The screen cassette is made of aluminium and is powder coated in white.

REMOTE CONTROL

The screen is operated by a remote control or the control box that is mounted on the electric cord. The remote control is a RF-emitter so there is no need for visual contact between the emitter and the receiver. Because of this the control box can be placed behind panels or furniture.

POWER

The Kingpin Crown electric screen is CE-certified in accordance to the LVD-Directive and is operated by 230V / 50-60Hz.

MOTOR / END POSITIONS

Due to the tubular motor placed inside the axle pipe, the width of the cassette is only slightly more (11 cm) than the width of the screen itself. The end positions of the screen can be adjusted very easily and with great precision.

SCREEN FABRIC / GAIN

For a natural projection, the gain value of the screen fabric is 1,0. The screen fabric is made of cotton.

BLACK BORDERS / BLACKDROP

The picture area is surrounded by 5 cm wide black borders. Above the picture area, there is a so called blackdrop of 10-40 cm, depending on the size and format of the screen. The screen has a black reverse side for better contrast and depth.

TECHNICAL SPECIFICATION CROWN ELECTRIC SCREEN

Article number	Size	Format	Gain matte white	Fabric size (mm)	Borders (mm)	Black drop (mm)	Viewing area (mm)	Length cassette (mm)	Height cassette (mm)	Depth cassette (mm)	Weight Net/Gross (Kg)	Packaging L x W x H (mm)
